

# Live Deposition Simulation & 30(b)(6) Prep

## See what a real deposition looks like—before you're ever in the hot seat!

This year's Trucksafe Fleet Compliance Bootcamp will feature a brand-new, half-day (Sept 18) immersive session designed to prepare fleet safety professionals for one of the most high-risk moments in post-crash litigation: the deposition.

In this live, courtroom-style simulation, attendees will watch a realistic deposition of a fleet safety director in a serious highway accident case—conducted by actual plaintiff and defense attorneys, with a witness walking through the experience in real time. This is not theory. This is what it actually looks like when your policies, records, decisions, and credibility are under a microscope.

## What You'll Experience

- A live, simulated deposition modeled on a real-world highway accident case
- Plaintiff and defense counsel demonstrating common questioning strategies and pressure tactics
- A safety professional witness navigating difficult questions, document traps, and credibility challenges
- A post-deposition panel discussion with experienced litigators and fleet safety professionals breaking down:
  - Common mistakes made by safety managers during depositions
  - How innocent answers can be reframed—or weaponized
  - The records, policies, and emails that get the most scrutiny
  - Practical steps fleets can take now to reduce deposition risk later

## Why This Session Matters

Most fleet safety professionals never receive formal training on depositions—yet they are routinely called upon to testify as corporate representatives under Rule 30(b)(6). What you say, how you say it, and what your documents show can directly impact liability exposure, settlement value, and company reputation.

This session is designed to help you:

- Understand what attorneys are really looking for
- Avoid common pitfalls that create unnecessary exposure
- Better prepare your safety program, documentation, and internal processes
- Walk into a deposition informed, confident, and prepared

## Registration Details

- Discounted access with full Trucksafe Bootcamp registration
- Also available as a standalone, ticketed session for non-Bootcamp attendees
- Ideal for safety directors, safety managers, risk managers, compliance leaders, and executives

Whether you've already been deposed—or know it's only a matter of time—this session offers rare, behind-the-scenes insight into one of the most consequential moments in trucking litigation.

This isn't just education. It's preparation!
